MERIT'S M+A+D adder ADDS UP TO FUN AND PROFITS

THE OBJECT: Clear all the lit buttons each round before time runs out.

THE PLAY: Select a flashing number and hit a combination of lit buttons that add up to a match. Keep going until all the lit buttons are out. Here's the rub: if the number can't be matched, reject it and select a new one—but watch the timer. It's a mad dash to finish the round!

THE SCORING: Each match scores that number of points, plus speed points. The action is hot! Complete the round and score bonus points.

Two rounds per game. Complete them and keep going. Each level speeds up.

Dip-Switchable
"Quarter Grabber"
5 plays for $1

BUY-IN Players can buy-in and continue from any level if they get stumped. The challenge is there.

Full bookkeeping functions to monitor location play stats.
